Don't Forget the Place

Illinois Student Engineering Exhibition

at the
College of Engineering, University of Illinois
Urbana-Champaign, Saturday, April 13, 1935

A program put on only as students can develop one—full of interest, pep, spectacular displays, interesting and instructive.

The nine departments of the College of Engineering will be in full operation (Civil, Mechanical, Electrical, Theoretical and Applied Mechanics, Physics, Mining and Metallurgy, General Engineering Drawing, Railway, and Ceramics). It is the one day in the school year when the visitor has an opportunity to see the College of Engineering in a great university operating at "full speed."

Have you ever seen a gas engine so small it can be held in your hand while operating at 5000 revolutions a minute, or stamps smashing and crushing gold ore, a talking tape, an electric fish screen, or a testing machine so large it breaks huge railroad rails like so many matches? These and hundreds of other tests, experiments, and demonstrations will be in operation.

Even though you are not planning an engineering career, you will find much to interest you on the campus that day. The Deans of the Colleges of Liberal Arts, Law, Education, Agriculture, Commerce, and Fine and Applied Arts, are cooperating by making their facilities available for inspection.

Prospective University students, high school and others, men and women, will find this exhibition of tremendous interest. Take a holiday and visit the I.S.E.E. or other points of interest on the campus. Guides will be furnished. Can you afford to miss it?

Be sure to come. 10 A.M. to 10 P.M. There are no admission charges.

Address all communications to WALT ENGER, President, Student Engineers Council, 212 Transportation Building, Urbana, Illinois.
